

What is the JOBS Program?

The JOBS program is an innovative, supported employment and intensive case management program for young adults ages 16-22, which uses employment as a starting point for engagement. The program focuses on young adults who have multiple barriers to success, such as those who are experiencing mental health and substance abuse challenges, have dropped out of school, are at risk of homelessness, are exiting the foster care system, or have involvement in the correctional system.

The program supports young adults in getting and keeping stable, competitive employment while working to overcome barriers and successfully transition into adulthood. Building a trusting, therapeutic relationship with young adults is vital and allows the JOBS clinician to help the client address all support needs from a more holistic approach.

The JOBS Program is a collaborative effort of VocRehab Vermont and the Child, Youth and Family Services (CYFS) department at NKHS.

JOBS Mission

- Offer support services to young adults through case management from adolescence to adulthood.
- Assist young adults in finding and sustaining employment that is both rewarding and supportive.
- Empower young adults to make healthy life choices by enhancing access to community resources and building skills.
